

# Leica NA300/500/700 Series Automatic Levels

Reliable levels for your site

# Leica NA300 Series – 320/324/332

## Unique. Accurate. Simple.

### Reliable levels for the construction and building site

The Leica NA300 series of automatic levels has been developed for professionals who are looking for the highest quality results day by day. Even with so many obstructions and uneven surfaces on construction and building sites, the NA300 levels rise to the occasion and ensure the straightest and safest construction possible. The NA300 series is your reliable partner for accurate measurements and high quality results.

The NA300 series offer increased ergonomic handling while ensuring the highest quality results at the best price value. Add easy operation to this and you have the perfect partner on any job site.

#### **UNIQUE DESIGN**

Whether you're facing basic demands or you need more support, the unique design of the Leica NA300 series of automatic levels can meet you wherever you are in the building and construction field. With a better protected shape, these rugged levels offer increased ergonomic handling while ensuring you receive the highest quality results at the best price value.

#### **ACCURATE**

The Leica NA300 series have been engineered for daily leveling tasks. Whatever the need, these levels measure with the highest precision and accuracy. Not only does the NA300 series provide you with best results, it also enables easy operation, ergonomic handling and durability even under the harshest conditions.

#### **SIMPLE**

A perfectly designed mirror makes it extremely easy to adjust the horizontal level with the highest possible accuracy and confidence. The Leica NA300 series, along with all our automatic optical levels, are made for everyday use at any site.

#### **PROTECTED**

More than 270 Leica Geosystems Service Centers worldwide ensure you work with complete peace of mind, wherever your construction site is located. Leica Geosystems offers unbeaten service for all of its NA series levels. The IP54 standard ensures the highest quality measurements even in the most challenging environments.

# Leica NA500 Series – 520/524/532

## Engineered for professionals by experts

### **Unique. Focused. Protected.**

Professionals face many obstructions onsite. Whatever the leveling challenge, the Leica NA500 series will overcome it. Rely on the known expertise of Leica Geosystems for the best quality and performance. On your terms, on your site, Leica Geosystems and the NA500 series are your trusted partners for accurate measurements every time.

Unlike other economical automatic optical levels on the market, the unique design of the NA500 series features proven technology and provides the highest quality results in its class while working in the most rugged of conditions.

#### **UNIQUE DESIGN**

The Leica NA500 series are designed for professionals by experts. Built tougher to withstand any construction site condition, the unique design supports easy handling while ensuring the highest quality results.

#### **ACCURATE**

Whatever the leveling task, the Leica NA500 series measure with the highest precision. They provide the highest precision, offer easy ergonomic handling and perform even under the harshest conditions.

#### **FOCUSED**

The target diopter makes it quick and easy to focus on the staff. By making this essential task as easy as possible, the Leica NA500 series level allows construction professionals to work as time-efficiently as possible, saving time and money.

#### **PROTECTED**

The IP56 standard ensures the highest quality measurements even under the harshest conditions. With the Leica NA500 series, there's no need to worry about protecting your product against rough construction site conditions. It's dust and water-tight and made to last.

# Leica NA700 Series – 720/724/728/730(plus) Jobsite tough – simply without compromise

## **Superior performance with first-class service**

The Leica NA700 series defy the toughest of building site environments. Come rain or shine, in dazzling light or shade, these levels provide reliable and extremely precise measurement results. Even heavy construction machinery vibration won't affect their accuracy. Save time and money without the need for regular checks in a workshop or constant readjustment. When it comes to extreme robustness and optimum measuring accuracy, the NA700 series are hard to beat.

Thanks to Leica Geosystems' latest technology combined with its requirements for only the highest quality, the Leica NA700 series enjoy an outstanding reputation across the globe.

#### **NO CONVERSION**

In degrees or gon, easily find the readout next to the target telescope. Working closely with construction professionals, specialized requirements on work sites are carefully evaluated and implemented in detail. Leica Geosystems is the trusted partner when it comes to reliable automatic levels for accurate measurements on challenging work sites.

#### **OUTSTANDING CONTRAST**

Neither rainfall and cloudy conditions nor sunshine and shadows can prevent the Leica NA700 series from working. The high luminosity guarantees reading accuracy, even in unfavorable lighting. In addition to this feature, Leica Geosystems offers a wide variety of tripods and leveling staffs. Optimize the performance of your NA700 level with these specially tailored accessories.

#### **CONSTANT CLEAR VIEW**

The nitrogen-filled telescope prevents the lens from fogging up and ensures a clear view. In combination with the high luminosity, these features makes the Leica NA700 series your ideal partner on any construction site.

#### **DUST AND WATER TIGHT**

Water, dust and dirt will not stop the Leica NA700 levels. The IP57 standard ensures the highest quality measurements even under the harshest conditions. With dust and water tight levels like the NA700 series, there is no need to worry about any adverse effect construction site conditions could have on your level - they won't.

Revolutionizing the world of measurement and survey for nearly 200 years, Leica Geosystems creates complete solutions for professionals across the planet. Known for premier products and innovative solution development, professionals in a diverse mix of industries, such as aerospace and defense, safety and security, construction, and manufacturing, trust Leica Geosystems for all their geospatial needs. With precise and accurate instruments, sophisticated software, and dependable services, Leica Geosystems delivers value every day to those shaping the future of our world.

Leica Geosystems is part of Hexagon (Nasdaq Stockholm: HEXA B; hexagon.com), a leading global provider of information technologies that drive quality and productivity improvements across geospatial and industrial enterprise applications.
